## ALL Natural Costa Rican Caribe Mosquito Shield Ingredients

100% Pure Catnip oil

100% Pure Commmint oil

100% Pure Rosemary oil

100% Pure Vegetable Glycerin,

Water

**Costa Rican Caribe Mosquito Shield** is the most powerful long lasting **natural** protection against Mosquitoes, Black Flies, Horse Flies and other pests.. Mosquitoes are the main carrier of the West Nile Virus, Encephalitis, Dengue Fever, Malaria, and other dangerous illnesses.

**This is how it works:** Mosquitoes actually smell you. They have special sensors on their bodies that sense carbon dioxide which you exhale and your body produces. When you spray yourself with our product they smell plants instead of you and look elsewhere for a meal.

Vegetable Glycerin helps keep the repellent on the skin for up to 8 hours. This is a 100% Natural Insect Shield without the potential dangerous side effects of chemicals.

**Application Instructions:** **Shake well before and during use**, apply liberally. Spray on arms, legs and any exposed areas or areas vulnerable to bites. Mosquitoes will bite through socks and loose weave clothing that is in direct contact with skin surface - so application may be required under these clothes. For application to face and head, spray into hands and rub on face and neck areas needing protection.

**Please take note:** This product is not an insecticide or pesticide, it will not kill insects or you but it will prevent them from finding and biting you.
